

I'm not robot!

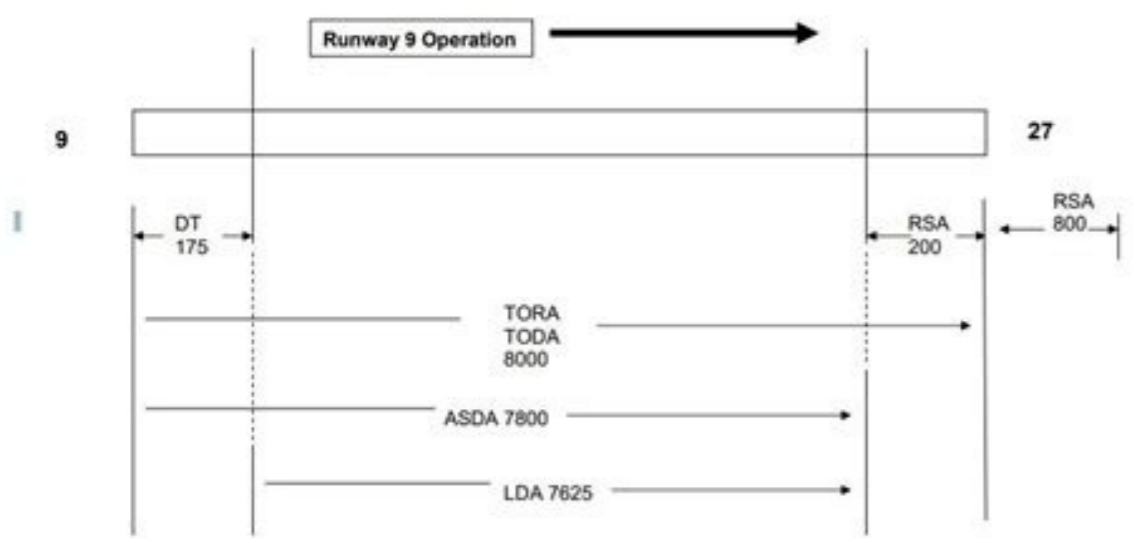

APPENDIX

For declared distance definitions and further information on these concepts, see AC150/5300-13.

EXAMPLE Runway 9 - 27 is 8000 feet. (In calculating declared distances, always use one runway end at a time, never try to figure both ends together, since that will only confuse the situation. Also use arrows to show the direction of operation.)

Runway 9: Runway 9 has a displaced threshold of 175 feet. The departure end of the runway is used to gain a 200 foot safety area needed to complete the 1000 foot required RSA for this runway.
